

## Missing Numbers in Equations (G)

What value does each shape represent?

$$\diamond \times 3 = 9$$

$$\Delta \times 1 = 2$$

$$7 \times \diamond = 63$$

$$\triangle \times 8 = 56$$

$$1 \times \square = 8$$

$$\square \times 5 = 25$$

$$9 \times \Delta = 9$$

$$6 \times \odot = 12$$

$$9 \times \diamond = 81$$

$$2 \times \square = 10$$

$$\blacksquare \times 4 = 4$$

$$\times \times 4 = 20$$

$$5 \times \square = 35$$

$$\odot \times 8 = 24$$

$$\boxplus \times 8 = 8$$

$$3 \times \square = 6$$

$$\blacklozenge \times 8 = 48$$

$$6 \times \square = 48$$

$$5 \times \square = 15$$

$$\odot \times 5 = 35$$

$$\square \times 2 = 14$$

$$\blacksquare \times 5 = 20$$

$$4 \times \square = 32$$

$$\blacklozenge \times 9 = 27$$

$$7 \times \square = 63$$

$$3 \times \heartsuit = 24$$

$$\spadesuit \times 7 = 28$$

$$\diamond \times 1 = 3$$

$$\star \times 1 = 1$$

$$9 \times * = 54$$

$$5 \times \star = 30$$

$$2 \times \square = 8$$

$$\odot \times 1 = 2$$

$$\boxplus \times 3 = 12$$

$$7 \times \square = 7$$

$$7 \times \diamond = 35$$

$$4 \times \diamond = 16$$

$$5 \times \times = 15$$

$$2 \times \square = 14$$

$$4 \times \square = 28$$
