

Solving Simple Linear Equations (A)

Name: _____

Date: _____

Score: _____

Solve each equation by determining the value of the unknown (letter).

1. $24 = 12 \times m$

2. $72 \div w = 8$

3. $340 = 17 \times x$

4. $16 = c + 5$

5. $14 + h = 15$

6. $15 = j + 14$

7. $8 = s \div 10$

8. $12 = n \div 4$

9. $13 + y = 32$

10. $a + 17 = 19$

11. $90 \div b = 5$

12. $33 - f = 16$

13. $28 - v = 15$

14. $25 = 17 + r$

15. $48 = 8 \times t$

16. $z \times 1 = 17$

17. $5 = 11 - p$

18. $16 = 28 - g$

19. $3 = 15 - d$

20. $7 = 14 - k$
