

Solving Simple Linear Equations (B)

Name: _____

Date: _____

Score: _____

Solve each equation by determining the value of the unknown (letter).

1. $27 - x = 19$

2. $15 \times m = 210$

3. $19 = n \div 6$

4. $10 \times w = 130$

5. $156 \div z = 13$

6. $g + 16 = 36$

7. $k \times 14 = 196$

8. $a \times 14 = 154$

9. $9 = 23 - j$

10. $112 = 8 \times p$

11. $f \div 1 = 19$

12. $54 = 6 \times d$

13. $17 \times v = 136$

14. $36 = c \times 4$

15. $4 = h \times 1$

16. $16 = s + 4$

17. $20 = y - 3$

18. $156 = r \times 12$

19. $11 = 1 \times b$

20. $8 = 20 - t$
