

Rewriting Formulas (C)

Solve for x in terms of the other variables.

1. $v - (x + z) = a$

6. $1 = u - (x + v)$

11. $x - c + 9 = u$

2. $x + u + b = z$

7. $3 - x + y = z$

12. $z = x - u + b$

3. $x - v + 4 = b$

8. $y - x + z = b$

13. $u = x + z - y$

4. $x + b - z = u$

9. $u - (v - x) = b$

14. $x - a + b = z$

5. $v - (x + u) = y$

10. $x - v + u = 1$

15. $x - u - v = b$
