

## Linear Systems (G)

Solve each system of equations.

$$\begin{aligned} 1. \quad & -5c - 4x = -25 \\ & -2c = -10 \end{aligned}$$

$$\begin{aligned} 5. \quad & a - 5z = -9 \\ & -3a = -3 \end{aligned}$$

$$\begin{aligned} 2. \quad & 4a - 3b = 38 \\ & 4a = 20 \end{aligned}$$

$$\begin{aligned} 6. \quad & -6u - 3z = -3 \\ & 4u = 8 \end{aligned}$$

$$\begin{aligned} 3. \quad & 2u - 6x = 6 \\ & 5u = 15 \end{aligned}$$

$$\begin{aligned} 7. \quad & 3c + 5v = -14 \\ & -2c = -4 \end{aligned}$$

$$\begin{aligned} 4. \quad & -2x + 5y = 7 \\ & 6x = -36 \end{aligned}$$

$$\begin{aligned} 8. \quad & 2a + 6u = 2 \\ & 5a = -25 \end{aligned}$$
