

Graphing Linear Systems (E)

Graph each system and identify its solution.

1. $x + y = -6$
 $3x - 5y = -10$

Solution: (----,----)

2. $2x - 7y = -7$
 $x - y = -6$

Solution: (----,----)

3. $3x + 2y = 14$
 $x - y = 3$

Solution: (----,----)

4. $x + 4y = -28$
 $9x + 4y = 36$

Solution: (----,----)

Graphing Linear Systems (E) Answers

Graph each system and identify its solution.

1. $x + y = -6$
 $3x - 5y = -10$

Solution: $(-5, -1)$

2. $2x - 7y = -7$
 $x - y = -6$

Solution: $(-7, -1)$

3. $3x + 2y = 14$
 $x - y = 3$

Solution: $(4, 1)$

4. $x + 4y = -28$
 $9x + 4y = 36$

Solution: $(8, -9)$
