

# Graphing Linear Systems (E)

Graph each system and identify its solution.

1.  $y = -\frac{1}{2}x + 2$   
 $5x + 8y = 8$

Solution: (\_\_\_\_,\_\_\_\_)

2.  $x + y = 8$   
 $2x - 3y = -9$

Solution: (\_\_\_\_,\_\_\_\_)

3.  $x + 4y = -28$   
 $9x + 8y = 0$

Solution: (\_\_\_\_,\_\_\_\_)

4.  $y = x - 6$   
 $3x - 2y = 10$

Solution: (\_\_\_\_,\_\_\_\_)
