

Standard Form of Linear Equations (B)

Write each equation in standard form. Identify the values for A, B and C.

1. $2 + 3y = 4x$

2. $7x = -5y - 6$

3. $1 = -3y + x$

4. $-5 - 8x = -6y$

5. $-4 + x = -5y$

6. $6y = -7x - 5$

7. $8x = -5 + 7y$

8. $7 - 8y = -3x$

9. $-9x = -4 + 5y$

10. $-1 = 2x - y$
