

Standard Form of Linear Equations (D)

Write each equation in standard form. Identify the values for A, B and C.

1. $3 = -2y - 7x$

2. $6y + 9x = -1$

3. $9y = -6 - 4x$

4. $9y - 4 = -6x$

5. $-5y - 2 = -3x$

6. $-x = 2y + 7$

7. $-3x = 8y + 3$

8. $-7 + 6x = -7y$

9. $3 - 8x = -3y$

10. $2x = -1 - 4y$
