

Standard Form of Linear Equations (G)

Write each equation in standard form. Identify the values for A, B and C.

1. $-7 - 8x = -9y$

2. $5x = -8 + 8y$

3. $9y = -4x + 3$

4. $3y - x = -9$

5. $2y = -4 - x$

6. $-4y = -4x - 2$

7. $3 = -3y + 3x$

8. $-x = -2y + 2$

9. $-4 + 2y = -7x$

10. $-7y - 4x = -8$
