

# OPEN THE PRESENT (I)

Each present makes each pair of fractions equivalent. Open each present.

1  $\frac{4}{7} = \frac{\text{present}}{14}$

6  $\frac{4}{5} = \frac{\text{present}}{20}$

2  $\frac{\text{present}}{10} = \frac{16}{20}$

7  $\frac{\text{present}}{9} = \frac{20}{45}$

3  $\frac{4}{6} = \frac{8}{\text{present}}$

8  $\frac{2}{5} = \frac{10}{\text{present}}$

4  $\frac{5}{\text{present}} = \frac{10}{16}$

9  $\frac{4}{\text{present}} = \frac{20}{25}$

5  $\frac{4}{7} = \frac{20}{\text{present}}$

10  $\frac{5}{\text{present}} = \frac{25}{45}$
