

## Adding Proper and Improper Fractions (B)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each sum.

1.  $\frac{4}{7} + \frac{22}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2.  $\frac{3}{6} + \frac{14}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3.  $\frac{1}{9} + \frac{7}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

4.  $\frac{3}{7} + \frac{29}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5.  $\frac{3}{5} + \frac{13}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

6.  $\frac{1}{9} + \frac{8}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

7.  $\frac{2}{7} + \frac{37}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

8.  $\frac{2}{5} + \frac{39}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

9.  $\frac{1}{4} + \frac{12}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

10.  $\frac{3}{5} + \frac{22}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

## Adding Proper and Improper Fractions (B) Answers

Name: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each sum.

$$1. \quad \frac{4}{7} + \frac{22}{14} = \frac{8}{14} + \frac{22}{14} = \frac{30}{14} = \frac{15}{7} = 2\frac{1}{7}$$

$$2. \quad \frac{3}{6} + \frac{14}{12} = \frac{6}{12} + \frac{14}{12} = \frac{20}{12} = \frac{5}{3} = 1\frac{2}{3}$$

$$3. \quad \frac{1}{9} + \frac{7}{3} = \frac{1}{9} + \frac{21}{9} = \frac{22}{9} = 2\frac{4}{9}$$

$$4. \quad \frac{3}{7} + \frac{29}{14} = \frac{6}{14} + \frac{29}{14} = \frac{35}{14} = \frac{5}{2} = 2\frac{1}{2}$$

$$5. \quad \frac{3}{5} + \frac{13}{10} = \frac{6}{10} + \frac{13}{10} = \frac{19}{10} = 1\frac{9}{10}$$

$$6. \quad \frac{1}{9} + \frac{8}{3} = \frac{1}{9} + \frac{24}{9} = \frac{25}{9} = 2\frac{7}{9}$$

$$7. \quad \frac{2}{7} + \frac{37}{14} = \frac{4}{14} + \frac{37}{14} = \frac{41}{14} = 2\frac{13}{14}$$

$$8. \quad \frac{2}{5} + \frac{39}{20} = \frac{8}{20} + \frac{39}{20} = \frac{47}{20} = 2\frac{7}{20}$$

$$9. \quad \frac{1}{4} + \frac{12}{8} = \frac{2}{8} + \frac{12}{8} = \frac{14}{8} = \frac{7}{4} = 1\frac{3}{4}$$

$$10. \quad \frac{3}{5} + \frac{22}{10} = \frac{6}{10} + \frac{22}{10} = \frac{28}{10} = \frac{14}{5} = 2\frac{4}{5}$$
