

# Adding Proper and Improper Fractions (A)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each sum.

1.  $\frac{1}{2} + \frac{3}{2} = \underline{\quad} = \underline{\quad} = \underline{\quad}$   
                                    Solve                      Simplify                      Convert ↓

2.  $\frac{4}{9} + \frac{16}{9} = \underline{\quad} = \underline{\quad}$

3.  $\frac{2}{8} + \frac{11}{8} = \underline{\quad} = \underline{\quad}$

4.  $\frac{1}{3} + \frac{7}{3} = \underline{\quad} = \underline{\quad}$

5.  $\frac{2}{3} + \frac{5}{3} = \underline{\quad} = \underline{\quad}$

6.  $\frac{5}{8} + \frac{13}{8} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

7.  $\frac{4}{7} + \frac{8}{7} = \underline{\quad} = \underline{\quad}$

8.  $\frac{2}{7} + \frac{8}{7} = \underline{\quad} = \underline{\quad}$

9.  $\frac{1}{7} + \frac{11}{7} = \underline{\quad} = \underline{\quad}$

10.  $\frac{4}{5} + \frac{6}{5} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

## Adding Proper and Improper Fractions (A) Answers

Calculate each sum.

1.  $\frac{1}{2} + \frac{3}{2} = \frac{4}{2} = \frac{2}{1} = 2$

2.  $\frac{4}{9} + \frac{16}{9} = \frac{20}{9} = 2\frac{2}{9}$

3.  $\frac{2}{8} + \frac{11}{8} = \frac{13}{8} = 1\frac{5}{8}$

4.  $\frac{1}{3} + \frac{7}{3} = \frac{8}{3} = 2\frac{2}{3}$

5.  $\frac{2}{3} + \frac{5}{3} = \frac{7}{3} = 2\frac{1}{3}$

6.  $\frac{5}{8} + \frac{13}{8} = \frac{18}{8} = \frac{9}{4} = 2\frac{1}{4}$

7.  $\frac{4}{7} + \frac{8}{7} = \frac{12}{7} = 1\frac{5}{7}$

8.  $\frac{2}{7} + \frac{8}{7} = \frac{10}{7} = 1\frac{3}{7}$

9.  $\frac{1}{7} + \frac{11}{7} = \frac{12}{7} = 1\frac{5}{7}$

10.  $\frac{4}{5} + \frac{6}{5} = \frac{10}{5} = \frac{2}{1} = 2$
