

Adding and Subtracting Two Mixed Fractions (B)

Name: _____

Date: _____

Score: _____

Calculate each result.

1. $8\frac{1}{5} - 4\frac{1}{5} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad} =$

2. $7\frac{2}{3} + 5\frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $8\frac{7}{8} - 1\frac{3}{8} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $8\frac{5}{6} - 2\frac{5}{6} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad} =$

5. $4\frac{4}{5} - 2\frac{4}{5} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad} =$

6. $5\frac{5}{6} + 3\frac{4}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $4\frac{1}{2} + 5\frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad} =$

8. $8\frac{8}{9} - 6\frac{8}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad} =$

9. $7\frac{3}{7} + 2\frac{3}{7} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $4\frac{2}{4} + 3\frac{2}{4} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad} =$
