

## Multiplying Mixed Fractions (E)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_ /10

Multiply, simplify and express the product as a mixed fraction.

1.  $2\frac{2}{5} \times 4\frac{4}{9} \times 4\frac{1}{4} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2.  $5\frac{1}{7} \times 3\frac{3}{8} \times 2\frac{1}{2} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3.  $4\frac{1}{3} \times 2\frac{1}{8} \times 2\frac{3}{5} = \underline{\quad} = \underline{\quad}$

4.  $5\frac{2}{5} \times 1\frac{5}{6} \times 5\frac{1}{9} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5.  $2\frac{3}{8} \times 3\frac{1}{4} \times 5\frac{1}{7} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

6.  $2\frac{3}{4} \times 1\frac{1}{2} \times 5\frac{3}{7} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

7.  $2\frac{1}{2} \times 1\frac{1}{6} \times 4\frac{1}{2} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

8.  $5\frac{1}{8} \times 1\frac{5}{7} \times 5\frac{4}{7} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

9.  $4\frac{3}{4} \times 2\frac{7}{8} \times 2\frac{1}{2} = \underline{\quad} = \underline{\quad}$

10.  $1\frac{2}{5} \times 5\frac{8}{9} \times 1\frac{3}{5} = \underline{\quad} = \underline{\quad}$
