

Multiplying Mixed Fractions (F)

Name: _____

Date: _____

Score: _____ /10

Multiply, simplify and express the product as a mixed fraction.

1. $3\frac{3}{4} \times 1\frac{3}{5} \times 3\frac{2}{5} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $2\frac{1}{4} \times 2\frac{4}{9} \times 2\frac{2}{7} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $4\frac{1}{8} \times 3\frac{1}{2} \times 3\frac{2}{3} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $5\frac{1}{2} \times 1\frac{3}{4} \times 4\frac{1}{3} = \underline{\quad} = \underline{\quad}$

5. $4\frac{1}{8} \times 1\frac{1}{9} \times 4\frac{1}{9} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $1\frac{6}{7} \times 4\frac{1}{3} \times 4\frac{1}{5} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $1\frac{1}{2} \times 4\frac{1}{2} \times 2\frac{3}{5} = \underline{\quad} = \underline{\quad}$

8. $3\frac{2}{7} \times 2\frac{1}{8} \times 2\frac{1}{8} = \underline{\quad} = \underline{\quad}$

9. $1\frac{1}{2} \times 2\frac{2}{7} \times 2\frac{1}{6} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $2\frac{1}{2} \times 3\frac{4}{5} \times 3\frac{1}{6} = \underline{\quad} = \underline{\quad} = \underline{\quad}$
