

Adding Two Proper Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{1}{2} + \frac{1}{18} =$

2. $\frac{7}{9} + \frac{1}{18} =$

3. $\frac{1}{7} + \frac{8}{14} =$

4. $\frac{2}{8} + \frac{8}{16} =$

5. $\frac{3}{4} + \frac{2}{16} =$

6. $\frac{3}{9} + \frac{1}{3} =$

7. $\frac{3}{6} + \frac{7}{18} =$

8. $\frac{1}{6} + \frac{1}{3} =$

9. $\frac{1}{2} + \frac{4}{12} =$

10. $\frac{3}{4} + \frac{1}{12} =$

Adding Two Proper Fractions (F) Answers

Name: _____

Date: _____

Score: _____

Calculate each sum.

$$1. \quad \frac{1}{2} + \frac{1}{18} = \frac{9}{18} + \frac{1}{18} = \frac{10}{18} = \frac{5}{9}$$

$$2. \quad \frac{7}{9} + \frac{1}{18} = \frac{14}{18} + \frac{1}{18} = \frac{15}{18} = \frac{5}{6}$$

$$3. \quad \frac{1}{7} + \frac{8}{14} = \frac{2}{14} + \frac{8}{14} = \frac{10}{14} = \frac{5}{7}$$

$$4. \quad \frac{2}{8} + \frac{8}{16} = \frac{4}{16} + \frac{8}{16} = \frac{12}{16} = \frac{3}{4}$$

$$5. \quad \frac{3}{4} + \frac{2}{16} = \frac{12}{16} + \frac{2}{16} = \frac{14}{16} = \frac{7}{8}$$

$$6. \quad \frac{3}{9} + \frac{1}{3} = \frac{3}{9} + \frac{3}{9} = \frac{6}{9} = \frac{2}{3}$$

$$7. \quad \frac{3}{6} + \frac{7}{18} = \frac{9}{18} + \frac{7}{18} = \frac{16}{18} = \frac{8}{9}$$

$$8. \quad \frac{1}{6} + \frac{1}{3} = \frac{1}{6} + \frac{2}{6} = \frac{3}{6} = \frac{1}{2}$$

$$9. \quad \frac{1}{2} + \frac{4}{12} = \frac{6}{12} + \frac{4}{12} = \frac{10}{12} = \frac{5}{6}$$

$$10. \quad \frac{3}{4} + \frac{1}{12} = \frac{9}{12} + \frac{1}{12} = \frac{10}{12} = \frac{5}{6}$$
