

## Adding Two Proper Fractions (F)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each sum.

1.  $\frac{3}{9} + \frac{1}{3} =$

2.  $\frac{5}{7} + \frac{3}{14} =$

3.  $\frac{2}{8} + \frac{2}{4} =$

4.  $\frac{2}{5} + \frac{5}{20} =$

5.  $\frac{1}{5} + \frac{5}{20} =$

6.  $\frac{6}{8} + \frac{2}{16} =$

7.  $\frac{2}{4} + \frac{5}{16} =$

8.  $\frac{2}{6} + \frac{1}{12} =$

9.  $\frac{1}{2} + \frac{9}{20} =$

10.  $\frac{2}{5} + \frac{7}{15} =$

## Adding Two Proper Fractions (F) Answers

Calculate each sum.

$$1. \quad \frac{3}{9} + \frac{1}{3} = \frac{3}{9} + \frac{3}{9} = \frac{6}{9} = \frac{2}{3}$$

$$2. \quad \frac{5}{7} + \frac{3}{14} = \frac{10}{14} + \frac{3}{14} = \frac{13}{14}$$

$$3. \quad \frac{2}{8} + \frac{2}{4} = \frac{2}{8} + \frac{4}{8} = \frac{6}{8} = \frac{3}{4}$$

$$4. \quad \frac{2}{5} + \frac{5}{20} = \frac{8}{20} + \frac{5}{20} = \frac{13}{20}$$

$$5. \quad \frac{1}{5} + \frac{5}{20} = \frac{4}{20} + \frac{5}{20} = \frac{9}{20}$$

$$6. \quad \frac{6}{8} + \frac{2}{16} = \frac{12}{16} + \frac{2}{16} = \frac{14}{16} = \frac{7}{8}$$

$$7. \quad \frac{2}{4} + \frac{5}{16} = \frac{8}{16} + \frac{5}{16} = \frac{13}{16}$$

$$8. \quad \frac{2}{6} + \frac{1}{12} = \frac{4}{12} + \frac{1}{12} = \frac{5}{12}$$

$$9. \quad \frac{1}{2} + \frac{9}{20} = \frac{10}{20} + \frac{9}{20} = \frac{19}{20}$$

$$10. \quad \frac{2}{5} + \frac{7}{15} = \frac{6}{15} + \frac{7}{15} = \frac{13}{15}$$
