

Adding Two Proper Fractions (J)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{2}{3} + \frac{2}{12} =$

2. $\frac{1}{3} + \frac{5}{15} =$

3. $\frac{1}{6} + \frac{1}{12} =$

4. $\frac{2}{8} + \frac{10}{16} =$

5. $\frac{1}{2} + \frac{2}{10} =$

6. $\frac{1}{8} + \frac{2}{4} =$

7. $\frac{2}{3} + \frac{3}{15} =$

8. $\frac{3}{8} + \frac{1}{2} =$

9. $\frac{1}{3} + \frac{3}{12} =$

10. $\frac{1}{2} + \frac{3}{12} =$

Adding Two Proper Fractions (J) Answers

Name: _____

Date: _____

Score: _____

Calculate each sum.

$$1. \quad \frac{2}{3} + \frac{2}{12} = \frac{8}{12} + \frac{2}{12} = \frac{10}{12} = \frac{5}{6}$$

$$2. \quad \frac{1}{3} + \frac{5}{15} = \frac{5}{15} + \frac{5}{15} = \frac{10}{15} = \frac{2}{3}$$

$$3. \quad \frac{1}{6} + \frac{1}{12} = \frac{2}{12} + \frac{1}{12} = \frac{3}{12} = \frac{1}{4}$$

$$4. \quad \frac{2}{8} + \frac{10}{16} = \frac{4}{16} + \frac{10}{16} = \frac{14}{16} = \frac{7}{8}$$

$$5. \quad \frac{1}{2} + \frac{2}{10} = \frac{5}{10} + \frac{2}{10} = \frac{7}{10}$$

$$6. \quad \frac{1}{8} + \frac{2}{4} = \frac{1}{8} + \frac{4}{8} = \frac{5}{8}$$

$$7. \quad \frac{2}{3} + \frac{3}{15} = \frac{10}{15} + \frac{3}{15} = \frac{13}{15}$$

$$8. \quad \frac{3}{8} + \frac{1}{2} = \frac{3}{8} + \frac{4}{8} = \frac{7}{8}$$

$$9. \quad \frac{1}{3} + \frac{3}{12} = \frac{4}{12} + \frac{3}{12} = \frac{7}{12}$$

$$10. \quad \frac{1}{2} + \frac{3}{12} = \frac{6}{12} + \frac{3}{12} = \frac{9}{12} = \frac{3}{4}$$
