

## Adding Two Proper Fractions (F)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each sum.

1.  $\frac{1}{2} + \frac{6}{10} =$

2.  $\frac{4}{5} + \frac{5}{10} =$

3.  $\frac{3}{4} + \frac{1}{2} =$

4.  $\frac{4}{5} + \frac{7}{15} =$

5.  $\frac{1}{3} + \frac{9}{12} =$

6.  $\frac{5}{6} + \frac{7}{12} =$

7.  $\frac{2}{7} + \frac{13}{14} =$

8.  $\frac{4}{6} + \frac{1}{2} =$

9.  $\frac{4}{9} + \frac{2}{3} =$

10.  $\frac{7}{8} + \frac{15}{16} =$

## Adding Two Proper Fractions (F) Answers

Calculate each sum.

$$1. \quad \frac{1}{2} + \frac{6}{10} = \frac{5}{10} + \frac{6}{10} = \frac{11}{10} = 1\frac{1}{10}$$

$$2. \quad \frac{4}{5} + \frac{5}{10} = \frac{8}{10} + \frac{5}{10} = \frac{13}{10} = 1\frac{3}{10}$$

$$3. \quad \frac{3}{4} + \frac{1}{2} = \frac{3}{4} + \frac{2}{4} = \frac{5}{4} = 1\frac{1}{4}$$

$$4. \quad \frac{4}{5} + \frac{7}{15} = \frac{12}{15} + \frac{7}{15} = \frac{19}{15} = 1\frac{4}{15}$$

$$5. \quad \frac{1}{3} + \frac{9}{12} = \frac{4}{12} + \frac{9}{12} = \frac{13}{12} = 1\frac{1}{12}$$

$$6. \quad \frac{5}{6} + \frac{7}{12} = \frac{10}{12} + \frac{7}{12} = \frac{17}{12} = 1\frac{5}{12}$$

$$7. \quad \frac{2}{7} + \frac{13}{14} = \frac{4}{14} + \frac{13}{14} = \frac{17}{14} = 1\frac{3}{14}$$

$$8. \quad \frac{4}{6} + \frac{1}{2} = \frac{4}{6} + \frac{3}{6} = \frac{7}{6} = 1\frac{1}{6}$$

$$9. \quad \frac{4}{9} + \frac{2}{3} = \frac{4}{9} + \frac{6}{9} = \frac{10}{9} = 1\frac{1}{9}$$

$$10. \quad \frac{7}{8} + \frac{15}{16} = \frac{14}{16} + \frac{15}{16} = \frac{29}{16} = 1\frac{13}{16}$$
