Adding Proper and Improper Fractions (A)

Name: _____ Date: _____ Score: _____

Calculate each sum.

1. $\frac{4}{9} + \frac{4}{3} =$

2. $\frac{1}{4} + \frac{5}{2} =$

3. $\frac{2}{6} + \frac{15}{12} =$

4. $\frac{1}{2} + \frac{9}{4} =$

5. $\frac{4}{5} + \frac{37}{20} =$

6. $\frac{1}{2} + \frac{25}{12} =$

7. $\frac{1}{6} + \frac{8}{3} =$

8. $\frac{1}{2} + \frac{29}{16} =$

9. $\frac{1}{2} + \frac{27}{16} =$

10. $\frac{2}{6} + \frac{41}{18} =$

Adding Proper and Improper Fractions (A) Answers

Name: _____ Date: _____ Score: _____

Calculate each sum.

1. $\frac{4}{9} + \frac{4}{3} = \frac{4}{9} + \frac{12}{9} = \frac{16}{9} = 1\frac{7}{9}$

2. $\frac{1}{4} + \frac{5}{2} = \frac{1}{4} + \frac{10}{4} = \frac{11}{4} = 2\frac{3}{4}$

3. $\frac{2}{6} + \frac{15}{12} = \frac{4}{12} + \frac{15}{12} = \frac{19}{12} = 1\frac{7}{12}$

4. $\frac{1}{2} + \frac{9}{4} = \frac{2}{4} + \frac{9}{4} = \frac{11}{4} = 2\frac{3}{4}$

5. $\frac{4}{5} + \frac{37}{20} = \frac{16}{20} + \frac{37}{20} = \frac{53}{20} = 2\frac{13}{20}$

6. $\frac{1}{2} + \frac{25}{12} = \frac{6}{12} + \frac{25}{12} = \frac{31}{12} = 2\frac{7}{12}$

7. $\frac{1}{6} + \frac{8}{3} = \frac{1}{6} + \frac{16}{6} = \frac{17}{6} = 2\frac{5}{6}$

8. $\frac{1}{2} + \frac{29}{16} = \frac{8}{16} + \frac{29}{16} = \frac{37}{16} = 2\frac{5}{16}$

9. $\frac{1}{2} + \frac{27}{16} = \frac{8}{16} + \frac{27}{16} = \frac{35}{16} = 2\frac{3}{16}$

10. $\frac{2}{6} + \frac{41}{18} = \frac{6}{18} + \frac{41}{18} = \frac{47}{18} = 2\frac{11}{18}$
