

Adding Proper and Improper Fractions (B)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{5}{9} + \frac{21}{18} =$

2. $\frac{2}{5} + \frac{35}{15} =$

3. $\frac{2}{4} + \frac{17}{12} =$

4. $\frac{1}{6} + \frac{8}{3} =$

5. $\frac{1}{9} + \frac{29}{18} =$

6. $\frac{6}{7} + \frac{21}{14} =$

7. $\frac{1}{2} + \frac{43}{20} =$

8. $\frac{1}{5} + \frac{38}{15} =$

9. $\frac{5}{6} + \frac{4}{3} =$

10. $\frac{1}{2} + \frac{29}{12} =$

Adding Proper and Improper Fractions (B) Answers

Name: _____

Date: _____

Score: _____

Calculate each sum.

$$1. \quad \frac{5}{9} + \frac{21}{18} = \frac{10}{18} + \frac{21}{18} = \frac{31}{18} = 1\frac{13}{18}$$

$$2. \quad \frac{2}{5} + \frac{35}{15} = \frac{6}{15} + \frac{35}{15} = \frac{41}{15} = 2\frac{11}{15}$$

$$3. \quad \frac{2}{4} + \frac{17}{12} = \frac{6}{12} + \frac{17}{12} = \frac{23}{12} = 1\frac{11}{12}$$

$$4. \quad \frac{1}{6} + \frac{8}{3} = \frac{1}{6} + \frac{16}{6} = \frac{17}{6} = 2\frac{5}{6}$$

$$5. \quad \frac{1}{9} + \frac{29}{18} = \frac{2}{18} + \frac{29}{18} = \frac{31}{18} = 1\frac{13}{18}$$

$$6. \quad \frac{6}{7} + \frac{21}{14} = \frac{12}{14} + \frac{21}{14} = \frac{33}{14} = 2\frac{5}{14}$$

$$7. \quad \frac{1}{2} + \frac{43}{20} = \frac{10}{20} + \frac{43}{20} = \frac{53}{20} = 2\frac{13}{20}$$

$$8. \quad \frac{1}{5} + \frac{38}{15} = \frac{3}{15} + \frac{38}{15} = \frac{41}{15} = 2\frac{11}{15}$$

$$9. \quad \frac{5}{6} + \frac{4}{3} = \frac{5}{6} + \frac{8}{6} = \frac{13}{6} = 2\frac{1}{6}$$

$$10. \quad \frac{1}{2} + \frac{29}{12} = \frac{6}{12} + \frac{29}{12} = \frac{35}{12} = 2\frac{11}{12}$$
