

## Adding Proper and Improper Fractions (G)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each sum.

1.  $\frac{4}{5} + \frac{31}{20} =$

2.  $\frac{1}{2} + \frac{15}{8} =$

3.  $\frac{3}{6} + \frac{44}{18} =$

4.  $\frac{1}{3} + \frac{23}{15} =$

5.  $\frac{2}{7} + \frac{37}{14} =$

6.  $\frac{1}{4} + \frac{13}{8} =$

7.  $\frac{3}{4} + \frac{20}{12} =$

8.  $\frac{1}{2} + \frac{10}{6} =$

9.  $\frac{5}{6} + \frac{4}{3} =$

10.  $\frac{1}{5} + \frac{11}{10} =$

## Adding Proper and Improper Fractions (G) Answers

Calculate each sum.

$$1. \quad \frac{4}{5} + \frac{31}{20} = \frac{16}{20} + \frac{31}{20} = \frac{47}{20} = 2\frac{7}{20}$$

$$2. \quad \frac{1}{2} + \frac{15}{8} = \frac{4}{8} + \frac{15}{8} = \frac{19}{8} = 2\frac{3}{8}$$

$$3. \quad \frac{3}{6} + \frac{44}{18} = \frac{9}{18} + \frac{44}{18} = \frac{53}{18} = 2\frac{17}{18}$$

$$4. \quad \frac{1}{3} + \frac{23}{15} = \frac{5}{15} + \frac{23}{15} = \frac{28}{15} = 1\frac{13}{15}$$

$$5. \quad \frac{2}{7} + \frac{37}{14} = \frac{4}{14} + \frac{37}{14} = \frac{41}{14} = 2\frac{13}{14}$$

$$6. \quad \frac{1}{4} + \frac{13}{8} = \frac{2}{8} + \frac{13}{8} = \frac{15}{8} = 1\frac{7}{8}$$

$$7. \quad \frac{3}{4} + \frac{20}{12} = \frac{9}{12} + \frac{20}{12} = \frac{29}{12} = 2\frac{5}{12}$$

$$8. \quad \frac{1}{2} + \frac{10}{6} = \frac{3}{6} + \frac{10}{6} = \frac{13}{6} = 2\frac{1}{6}$$

$$9. \quad \frac{5}{6} + \frac{4}{3} = \frac{5}{6} + \frac{8}{6} = \frac{13}{6} = 2\frac{1}{6}$$

$$10. \quad \frac{1}{5} + \frac{11}{10} = \frac{2}{10} + \frac{11}{10} = \frac{13}{10} = 1\frac{3}{10}$$
