Adding Two Mixed Fractions (J)

Name: _____ Date: _____ Score: _____

Calculate each sum.

1. $1\frac{2}{8} + 1\frac{1}{8} =$

2. $1\frac{1}{3} + 1\frac{1}{3} =$

3. $5\frac{2}{4} + 4\frac{1}{4} =$

4. $1\frac{1}{7} + 1\frac{3}{7} =$

5. $3\frac{2}{5} + 2\frac{4}{5} =$

6. $2\frac{3}{8} + 1\frac{2}{8} =$

7. $5\frac{4}{6} + 4\frac{1}{6} =$

8. $1\frac{3}{6} + 2\frac{2}{6} =$

9. $5\frac{5}{7} + 2\frac{4}{7} =$

10. $2\frac{3}{5} + 2\frac{4}{5} =$

Adding Two Mixed Fractions (J) Answers

Name: _____ Date: _____ Score: _____

Calculate each sum.

1. $1\frac{2}{8} + 1\frac{1}{8} = \frac{10}{8} + \frac{9}{8} = \frac{19}{8} = 2\frac{3}{8}$

2. $1\frac{1}{3} + 1\frac{1}{3} = \frac{4}{3} + \frac{4}{3} = \frac{8}{3} = 2\frac{2}{3}$

3. $5\frac{2}{4} + 4\frac{1}{4} = \frac{22}{4} + \frac{17}{4} = \frac{39}{4} = 9\frac{3}{4}$

4. $1\frac{1}{7} + 1\frac{3}{7} = \frac{8}{7} + \frac{10}{7} = \frac{18}{7} = 2\frac{4}{7}$

5. $3\frac{2}{5} + 2\frac{4}{5} = \frac{17}{5} + \frac{14}{5} = \frac{31}{5} = 6\frac{1}{5}$

6. $2\frac{3}{8} + 1\frac{2}{8} = \frac{19}{8} + \frac{10}{8} = \frac{29}{8} = 3\frac{5}{8}$

7. $5\frac{4}{6} + 4\frac{1}{6} = \frac{34}{6} + \frac{25}{6} = \frac{59}{6} = 9\frac{5}{6}$

8. $1\frac{3}{6} + 2\frac{2}{6} = \frac{9}{6} + \frac{14}{6} = \frac{23}{6} = 3\frac{5}{6}$

9. $5\frac{5}{7} + 2\frac{4}{7} = \frac{40}{7} + \frac{18}{7} = \frac{58}{7} = 8\frac{2}{7}$

10. $2\frac{3}{5} + 2\frac{4}{5} = \frac{13}{5} + \frac{14}{5} = \frac{27}{5} = 5\frac{2}{5}$
