

## Adding Two Proper Fractions (J)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each sum.

1.  $\frac{1}{2} + \frac{3}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

2.  $\frac{2}{6} + \frac{1}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

3.  $\frac{1}{4} + \frac{1}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

4.  $\frac{1}{9} + \frac{13}{18} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

5.  $\frac{2}{8} + \frac{1}{2} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

6.  $\frac{1}{2} + \frac{2}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

7.  $\frac{1}{7} + \frac{5}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

8.  $\frac{2}{6} + \frac{6}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

9.  $\frac{2}{7} + \frac{4}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

10.  $\frac{1}{7} + \frac{10}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$
