

Adding Two Proper Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{2}{3} + \frac{7}{18} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{4}{6} + \frac{11}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{3}{5} + \frac{7}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{1}{2} + \frac{4}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{1}{5} + \frac{9}{10} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{2}{3} + \frac{8}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\frac{3}{4} + \frac{9}{16} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{1}{3} + \frac{5}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{5}{7} + \frac{13}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{6}{7} + \frac{3}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

Adding Two Proper Fractions (F) Answers

Name: _____

Date: _____

Score: _____

Calculate each sum.

$$1. \quad \frac{2}{3} + \frac{7}{18} = \frac{12}{18} + \frac{7}{18} = \frac{19}{18} = 1\frac{1}{18}$$

$$2. \quad \frac{4}{6} + \frac{11}{12} = \frac{8}{12} + \frac{11}{12} = \frac{19}{12} = 1\frac{7}{12}$$

$$3. \quad \frac{3}{5} + \frac{7}{10} = \frac{6}{10} + \frac{7}{10} = \frac{13}{10} = 1\frac{3}{10}$$

$$4. \quad \frac{1}{2} + \frac{4}{6} = \frac{3}{6} + \frac{4}{6} = \frac{7}{6} = 1\frac{1}{6}$$

$$5. \quad \frac{1}{5} + \frac{9}{10} = \frac{2}{10} + \frac{9}{10} = \frac{11}{10} = 1\frac{1}{10}$$

$$6. \quad \frac{2}{3} + \frac{8}{9} = \frac{6}{9} + \frac{8}{9} = \frac{14}{9} = 1\frac{5}{9}$$

$$7. \quad \frac{3}{4} + \frac{9}{16} = \frac{12}{16} + \frac{9}{16} = \frac{21}{16} = 1\frac{5}{16}$$

$$8. \quad \frac{1}{3} + \frac{5}{6} = \frac{2}{6} + \frac{5}{6} = \frac{7}{6} = 1\frac{1}{6}$$

$$9. \quad \frac{5}{7} + \frac{13}{14} = \frac{10}{14} + \frac{13}{14} = \frac{23}{14} = 1\frac{9}{14}$$

$$10. \quad \frac{6}{7} + \frac{3}{14} = \frac{12}{14} + \frac{3}{14} = \frac{15}{14} = 1\frac{1}{14}$$
