

Adding Two Proper Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{5}{6} + \frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{1}{2} + \frac{6}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{5}{9} + \frac{17}{18} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{4}{5} + \frac{18}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{1}{2} + \frac{17}{18} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{4}{5} + \frac{10}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\frac{3}{5} + \frac{10}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{3}{5} + \frac{16}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{2}{3} + \frac{9}{18} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{4}{6} + \frac{2}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

Adding Two Proper Fractions (F) Answers

Name: _____

Date: _____

Calculate each sum.

$$1. \quad \frac{5}{6} + \frac{2}{3} = \frac{5}{6} + \frac{4}{6} = \frac{9}{6} = \frac{3}{2} = 1\frac{1}{2}$$

$$2. \quad \frac{1}{2} + \frac{6}{8} = \frac{4}{8} + \frac{6}{8} = \frac{10}{8} = \frac{5}{4} = 1\frac{1}{4}$$

$$3. \quad \frac{5}{9} + \frac{17}{18} = \frac{10}{18} + \frac{17}{18} = \frac{27}{18} = \frac{3}{2} = 1\frac{1}{2}$$

$$4. \quad \frac{4}{5} + \frac{18}{20} = \frac{16}{20} + \frac{18}{20} = \frac{34}{20} = \frac{17}{10} = 1\frac{7}{10}$$

$$5. \quad \frac{1}{2} + \frac{17}{18} = \frac{9}{18} + \frac{17}{18} = \frac{26}{18} = \frac{13}{9} = 1\frac{4}{9}$$

$$6. \quad \frac{4}{5} + \frac{10}{20} = \frac{16}{20} + \frac{10}{20} = \frac{26}{20} = \frac{13}{10} = 1\frac{3}{10}$$

$$7. \quad \frac{3}{5} + \frac{10}{20} = \frac{12}{20} + \frac{10}{20} = \frac{22}{20} = \frac{11}{10} = 1\frac{1}{10}$$

$$8. \quad \frac{3}{5} + \frac{16}{20} = \frac{12}{20} + \frac{16}{20} = \frac{28}{20} = \frac{7}{5} = 1\frac{2}{5}$$

$$9. \quad \frac{2}{3} + \frac{9}{18} = \frac{12}{18} + \frac{9}{18} = \frac{21}{18} = \frac{7}{6} = 1\frac{1}{6}$$

$$10. \quad \frac{4}{6} + \frac{2}{3} = \frac{4}{6} + \frac{4}{6} = \frac{8}{6} = \frac{4}{3} = 1\frac{1}{3}$$
