

Adding Two Proper Fractions (J)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{4}{5} + \frac{6}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{2}{4} + \frac{4}{7} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{4}{6} + \frac{10}{11} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{5}{7} + \frac{2}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{4}{7} + \frac{9}{15} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{5}{7} + \frac{9}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\frac{4}{6} + \frac{13}{17} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{2}{8} + \frac{13}{17} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{2}{6} + \frac{6}{7} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{3}{9} + \frac{13}{19} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

Adding Two Proper Fractions (J) Answers

Name: _____

Date: _____

Calculate each sum.

$$1. \quad \frac{4}{5} + \frac{6}{8} = \frac{32}{40} + \frac{30}{40} = \frac{62}{40} = \frac{31}{20} = 1\frac{11}{20}$$

$$2. \quad \frac{2}{4} + \frac{4}{7} = \frac{14}{28} + \frac{16}{28} = \frac{30}{28} = \frac{15}{14} = 1\frac{1}{14}$$

$$3. \quad \frac{4}{6} + \frac{10}{11} = \frac{44}{66} + \frac{60}{66} = \frac{104}{66} = \frac{52}{33} = 1\frac{19}{33}$$

$$4. \quad \frac{5}{7} + \frac{2}{6} = \frac{30}{42} + \frac{14}{42} = \frac{44}{42} = \frac{22}{21} = 1\frac{1}{21}$$

$$5. \quad \frac{4}{7} + \frac{9}{15} = \frac{60}{105} + \frac{63}{105} = \frac{123}{105} = \frac{41}{35} = 1\frac{6}{35}$$

$$6. \quad \frac{5}{7} + \frac{9}{12} = \frac{60}{84} + \frac{63}{84} = \frac{123}{84} = \frac{41}{28} = 1\frac{13}{28}$$

$$7. \quad \frac{4}{6} + \frac{13}{17} = \frac{68}{102} + \frac{78}{102} = \frac{146}{102} = \frac{73}{51} = 1\frac{22}{51}$$

$$8. \quad \frac{2}{8} + \frac{13}{17} = \frac{34}{136} + \frac{104}{136} = \frac{138}{136} = \frac{69}{68} = 1\frac{1}{68}$$

$$9. \quad \frac{2}{6} + \frac{6}{7} = \frac{14}{42} + \frac{36}{42} = \frac{50}{42} = \frac{25}{21} = 1\frac{4}{21}$$

$$10. \quad \frac{3}{9} + \frac{13}{19} = \frac{57}{171} + \frac{117}{171} = \frac{174}{171} = \frac{58}{57} = 1\frac{1}{57}$$
