

## Adding Proper and Improper Fractions (B)

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_

Calculate each sum.

1.  $\frac{1}{2} + \frac{19}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2.  $\frac{2}{8} + \frac{20}{16} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3.  $\frac{1}{9} + \frac{28}{18} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

4.  $\frac{3}{9} + \frac{5}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5.  $\frac{3}{5} + \frac{26}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

6.  $\frac{5}{7} + \frac{25}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

7.  $\frac{4}{7} + \frac{18}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

8.  $\frac{4}{6} + \frac{20}{12} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

9.  $\frac{2}{4} + \frac{28}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

10.  $\frac{6}{7} + \frac{26}{14} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

## Adding Proper and Improper Fractions (B) Answers

Name: \_\_\_\_\_

Calculate each sum.

$$1. \quad \frac{1}{2} + \frac{19}{14} = \frac{7}{14} + \frac{19}{14} = \frac{26}{14} = \frac{13}{7} = 1\frac{6}{7}$$

$$2. \quad \frac{2}{8} + \frac{20}{16} = \frac{4}{16} + \frac{20}{16} = \frac{24}{16} = \frac{3}{2} = 1\frac{1}{2}$$

$$3. \quad \frac{1}{9} + \frac{28}{18} = \frac{2}{18} + \frac{28}{18} = \frac{30}{18} = \frac{5}{3} = 1\frac{2}{3}$$

$$4. \quad \frac{3}{9} + \frac{5}{3} = \frac{3}{9} + \frac{15}{9} = \frac{18}{9} = \frac{2}{1} = 2$$

$$5. \quad \frac{3}{5} + \frac{26}{20} = \frac{12}{20} + \frac{26}{20} = \frac{38}{20} = \frac{19}{10} = 1\frac{9}{10}$$

$$6. \quad \frac{5}{7} + \frac{25}{14} = \frac{10}{14} + \frac{25}{14} = \frac{35}{14} = \frac{5}{2} = 2\frac{1}{2}$$

$$7. \quad \frac{4}{7} + \frac{18}{14} = \frac{8}{14} + \frac{18}{14} = \frac{26}{14} = \frac{13}{7} = 1\frac{6}{7}$$

$$8. \quad \frac{4}{6} + \frac{20}{12} = \frac{8}{12} + \frac{20}{12} = \frac{28}{12} = \frac{7}{3} = 2\frac{1}{3}$$

$$9. \quad \frac{2}{4} + \frac{28}{20} = \frac{10}{20} + \frac{28}{20} = \frac{38}{20} = \frac{19}{10} = 1\frac{9}{10}$$

$$10. \quad \frac{6}{7} + \frac{26}{14} = \frac{12}{14} + \frac{26}{14} = \frac{38}{14} = \frac{19}{7} = 2\frac{5}{7}$$
