

Adding Proper and Improper Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $\frac{2}{5} + \frac{60}{16} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{2}{6} + \frac{44}{19} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{6}{8} + \frac{15}{7} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{4}{8} + \frac{4}{3} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $\frac{2}{3} + \frac{6}{4} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $\frac{2}{5} + \frac{24}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $\frac{4}{8} + \frac{73}{19} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{8}{9} + \frac{24}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{2}{6} + \frac{6}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{1}{3} + \frac{50}{20} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad} = \underline{\quad}$

Adding Proper and Improper Fractions (F) Answers

Name: _____

Date: _____

Calculate each sum.

$$1. \quad \frac{2}{5} + \frac{60}{16} = \frac{32}{80} + \frac{300}{80} = \frac{332}{80} = \frac{83}{20} = 4\frac{3}{20}$$

$$2. \quad \frac{2}{6} + \frac{44}{19} = \frac{38}{114} + \frac{264}{114} = \frac{302}{114} = \frac{151}{57} = 2\frac{37}{57}$$

$$3. \quad \frac{6}{8} + \frac{15}{7} = \frac{42}{56} + \frac{120}{56} = \frac{162}{56} = \frac{81}{28} = 2\frac{25}{28}$$

$$4. \quad \frac{4}{8} + \frac{4}{3} = \frac{12}{24} + \frac{32}{24} = \frac{44}{24} = \frac{11}{6} = 1\frac{5}{6}$$

$$5. \quad \frac{2}{3} + \frac{6}{4} = \frac{8}{12} + \frac{18}{12} = \frac{26}{12} = \frac{13}{6} = 2\frac{1}{6}$$

$$6. \quad \frac{2}{5} + \frac{24}{9} = \frac{18}{45} + \frac{120}{45} = \frac{138}{45} = \frac{46}{15} = 3\frac{1}{15}$$

$$7. \quad \frac{4}{8} + \frac{73}{19} = \frac{76}{152} + \frac{584}{152} = \frac{660}{152} = \frac{165}{38} = 4\frac{13}{38}$$

$$8. \quad \frac{8}{9} + \frac{24}{20} = \frac{160}{180} + \frac{216}{180} = \frac{376}{180} = \frac{94}{45} = 2\frac{4}{45}$$

$$9. \quad \frac{2}{6} + \frac{6}{5} = \frac{10}{30} + \frac{36}{30} = \frac{46}{30} = \frac{23}{15} = 1\frac{8}{15}$$

$$10. \quad \frac{1}{3} + \frac{50}{20} = \frac{20}{60} + \frac{150}{60} = \frac{170}{60} = \frac{17}{6} = 2\frac{5}{6}$$
