

Adding Two Mixed Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each sum.

1. $3\frac{4}{5} + 3\frac{4}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $2\frac{4}{5} + 1\frac{4}{5} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $5\frac{3}{6} + 2\frac{2}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $3\frac{2}{8} + 4\frac{1}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

5. $3\frac{4}{6} + 2\frac{3}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

6. $2\frac{3}{8} + 4\frac{6}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

7. $4\frac{3}{6} + 3\frac{2}{6} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $2\frac{3}{9} + 2\frac{5}{9} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $3\frac{6}{7} + 3\frac{4}{7} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $5\frac{3}{8} + 2\frac{4}{8} = \underline{\quad} + \underline{\quad} = \underline{\quad} = \underline{\quad}$
