

Subtracting Proper and Improper Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each difference.

1. $\frac{5}{4} - \frac{7}{8} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

11. $\frac{13}{10} - \frac{3}{5} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

2. $\frac{25}{14} - \frac{6}{7} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

12. $\frac{9}{6} - \frac{2}{3} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

3. $\frac{7}{6} - \frac{1}{3} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

13. $\frac{4}{3} - \frac{7}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

4. $\frac{9}{8} - \frac{1}{2} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

14. $\frac{17}{14} - \frac{6}{7} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

5. $\frac{21}{18} - \frac{2}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

15. $\frac{21}{14} - \frac{4}{7} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

6. $\frac{23}{20} - \frac{4}{5} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

16. $\frac{18}{15} - \frac{2}{3} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

7. $\frac{3}{2} - \frac{4}{6} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

17. $\frac{17}{14} - \frac{4}{7} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

8. $\frac{26}{18} - \frac{1}{2} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

18. $\frac{11}{8} - \frac{1}{2} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

9. $\frac{15}{14} - \frac{6}{7} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

19. $\frac{9}{8} - \frac{1}{4} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

10. $\frac{13}{12} - \frac{1}{2} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

20. $\frac{20}{14} - \frac{1}{2} = \underline{\quad} - \underline{\quad} = \underline{\quad}$
