

Subtracting Two Proper Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each difference.

1. $\frac{2}{3} - \frac{5}{12} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{2}{3} - \frac{2}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

3. $\frac{5}{8} - \frac{2}{4} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

4. $\frac{2}{3} - \frac{3}{6} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

5. $\frac{4}{7} - \frac{3}{14} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

6. $\frac{1}{7} - \frac{1}{14} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

7. $\frac{2}{3} - \frac{6}{18} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{4}{7} - \frac{5}{14} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

9. $\frac{1}{2} - \frac{1}{6} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{12}{14} - \frac{1}{2} = \underline{\quad} - \underline{\quad} = \underline{\quad}$
