

Subtracting Two Proper Fractions (D)

Name: _____

Date: _____

Score: _____

Calculate each difference.

1. $\frac{3}{9} - \frac{3}{20} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\frac{6}{8} - \frac{6}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\frac{3}{7} - \frac{3}{15} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

4. $\frac{5}{7} - \frac{1}{10} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

5. $\frac{16}{17} - \frac{4}{5} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

6. $\frac{3}{4} - \frac{4}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

7. $\frac{3}{6} - \frac{2}{19} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\frac{2}{4} - \frac{2}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

9. $\frac{7}{11} - \frac{3}{6} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

10. $\frac{1}{2} - \frac{1}{9} = \underline{\quad} - \underline{\quad} = \underline{\quad}$
