Adding Negative Fractions (D)

Calculate each sum.

1. $\left(-\dfrac{1}{11}\right) + \left(-\dfrac{9}{12}\right) = \text{---} + \text{---} = \text{---} = \text{---}$

2. $\left(-\dfrac{1}{3}\right) + \left(-\dfrac{1}{2}\right) = \text{---} + \text{---} = \text{---}$

3. $\left(-\dfrac{4}{10}\right) + \dfrac{2}{3} = \text{---} + \text{---} = \text{---} = \text{---}$

4. $\left(-\dfrac{2}{8}\right) + \left(-\dfrac{1}{7}\right) = \text{---} + \text{---} = \text{---} = \text{---}$

5. $\left(-\dfrac{5}{8}\right) + \left(-\dfrac{2}{7}\right) = \text{---} + \text{---} = \text{---}$

6. $\left(-\dfrac{4}{12}\right) + \dfrac{5}{11} = \text{---} + \text{---} = \text{---} = \text{---}$

7. $\left(-\dfrac{3}{10}\right) + \dfrac{1}{3} = \text{---} + \text{---} = \text{---}$

8. $\left(-\dfrac{4}{7}\right) + \dfrac{7}{10} = \text{---} + \text{---} = \text{---}$

9. $\left(-\dfrac{4}{9}\right) + \dfrac{8}{11} = \text{---} + \text{---} = \text{---}$

10. $\left(-\dfrac{2}{7}\right) + \dfrac{5}{8} = \text{---} + \text{---} = \text{---}$
