

Subtracting Negative Fractions (F)

Name: _____

Date: _____

Score: _____

Calculate each difference.

1. $\left(-\frac{1}{3}\right) - \frac{2}{4} = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

2. $\left(-\frac{2}{6}\right) - \left(-\frac{1}{5}\right) = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

3. $\left(-\frac{1}{4}\right) - \left(-\frac{3}{5}\right) = \underline{\quad} - \underline{\quad} = \underline{\quad}$

4. $\left(-\frac{1}{2}\right) - \left(-\frac{2}{3}\right) = \underline{\quad} - \underline{\quad} = \underline{\quad}$

5. $\left(-\frac{1}{5}\right) - \frac{1}{2} = \underline{\quad} - \underline{\quad} = \underline{\quad}$

6. $\left(-\frac{2}{3}\right) - \left(-\frac{2}{5}\right) = \underline{\quad} - \underline{\quad} = \underline{\quad}$

7. $\left(-\frac{2}{4}\right) - \left(-\frac{3}{5}\right) = \underline{\quad} - \underline{\quad} = \underline{\quad} = \underline{\quad}$

8. $\left(-\frac{2}{3}\right) - \left(-\frac{1}{4}\right) = \underline{\quad} - \underline{\quad} = \underline{\quad}$

9. $\left(-\frac{2}{3}\right) - \left(-\frac{3}{5}\right) = \underline{\quad} - \underline{\quad} = \underline{\quad}$

10. $\left(-\frac{1}{5}\right) - \left(-\frac{1}{4}\right) = \underline{\quad} - \underline{\quad} = \underline{\quad}$
