Adding and Subtracting Integers (J) Answers

Name: _____

Date: _____

Score: _____

Calculate each sum or difference.

$$8 + (-5) = 3 \qquad 2 + 6 = 8$$

$$7 + 7 = 14 \qquad -3 - 5 = -8$$

$$8 + (-4) = 4 \qquad -5 + 5 = 0$$

$$4 - (-8) = 12 \qquad -7 + 5 = -2$$

$$-7 - (-2) = -5 \qquad 3 + (-7) = -4$$

$$-6 + 6 = 0 \qquad -5 + 1 = -4$$

$$9 - (-9) = 18 \qquad 5 + (-2) = 3$$

$$5 - 8 = -3 \qquad -7 - 4 = -11$$

$$-5 - (-6) = 1 \qquad -9 + 4 = -5$$

$$-4 + (-9) = -13 \qquad 1 + (-3) = -2$$

$$-3 - (-6) = 3 \qquad 3 + 2 = 5$$

$$8 - (-7) = 15 \qquad 7 - (-9) = 16$$

$$9 + 6 = 15$$
