

Dividing Money (E)

Calculate each quotient.

1. $44 \overline{) €1813.68}$

2. $87 \overline{) €4117.71}$

3. $52 \overline{) €2934.36}$

4. $74 \overline{) €3791.76}$

5. $84 \overline{) €6493.20}$

6. $80 \overline{) €3904.00}$

7. $95 \overline{) €8788.45}$

8. $22 \overline{) €1033.56}$

9. $18 \overline{) €549.36}$

10. If 66 identical meals cost €4450.38, how much did each meal cost?
