

Dividing Money (E)

Calculate each quotient.

1. $49 \overline{) €2177.56}$

2. $99 \overline{) €6187.50}$

3. $39 \overline{) €2950.74}$

4. $77 \overline{) €3780.70}$

5. $46 \overline{) €1207.04}$

6. $76 \overline{) €1980.56}$

7. $87 \overline{) €7918.74}$

8. $19 \overline{) €1512.40}$

9. $87 \overline{) €1106.64}$

10. If 64 identical meals cost €4803.84, how much did each meal cost?
