

Dividing Money (G)

Calculate each quotient.

1. $14 \overline{) €835.52}$

2. $73 \overline{) €3696.72}$

3. $92 \overline{) €2325.76}$

4. $40 \overline{) €2908.80}$

5. $50 \overline{) €2101.00}$

6. $76 \overline{) €6727.52}$

7. $11 \overline{) €336.82}$

8. $68 \overline{) €6537.52}$

9. $31 \overline{) €3048.54}$

10. If 72 identical video games cost €4188.96, how much did each video game cost?
